I am an information technology fresh graduate with 2 years of experience in the IT sector, which has helped me enhanced my skills in web development, UI/UX design, and data engineering. Throughout my studies, I have completed several projects, such as developing content management system, learning management system, and monitoring dashboard using Laravel PHP, React, Java Springboot, and Tailwind.

Work Experiences

Thursina IIBS (Malang, Indonesia)   Jul 2025 - Present
Programmer

- Maintain Thursina Smart Education System (TSES), a comprehensive school information system (similar to SIAKAD), using PHP.
- Responsible for managing application deployment across three servers by implementing Docker, Kubernetes, and Argo CD, which improved deployment consistency, reduced manual intervention, and accelerated the rollout and rollback process.
- Ensure system stability and scalability, resulting in smoother operations and reduced downtime during application updates.

PT Venturo Pro Indonesia (Malang, Indonesia)   Mar 2025 - Jul 2025
Full Stack Developer (Intern)

- Developed a Point of Sale (POS) System application using Laravel, MySQL, and Vue.js.
- Built the HRIS StaffX application for employee data management using Laravel, MySQL, and Vue.js.
- Contributed to both frontend and backend development, API integration, and application performance optimization.

PT Sekawan Media Informatika (Malang, Indonesia)   Aug 2023 - Feb 2024
Full Stack Developer (Intern)

- Research and implemented PyroCMS and WinterCMS as alternatives to WordPress, successfully rebuilding the Sekawan Media landing page, resulting in improved site performance and easier content management.
- Developed and maintained the Talentnesia Learning Management System (LMS) using Laravel, implementing key features such as user dashboards, course management, enrollment, and significantly improving application performance.
- Redesigned the front-end of the Talentnesia LMS platform, focusing on responsiveness and usability.

Dinas Komunikasi Informatika dan Statistik Kota Blitar (Blitar, Indonesia)   Mar 2023 - Aug 2023
Full Stack Developer (Intern)

- Developed SIGMA, a full-stack web application using the Laravel framework (PHP) to modernize internship management, replacing a manual, paper-based system.
- Implemented core features including online registration, activity reporting, task assignment and tracking, performance evaluation, and automated digital certificate generation, significantly improving efficiency and reducing administrative overhead.
- Designed a user-friendly interface using HTML, CSS, and Tailwind CSS, focusing on intuitive navigation and a seamless user experience. Managed the backend infrastructure using Nginx, MySQL, and phpMyAdmin.
- Implemented SEO best practices, including optimized meta titles, descriptions, keywords, and Open Graph (OG) tags, to improve search engine visibility.

PT Rejoso Manis Indo (Blitar, Indonesia)   Sep 2019 - Dec 2020
Quality Control Analyst (Staff)

- Responsible for maintaining the quality of key materials (diesel, coal, quicklime, salt, and other chemicals) through comprehensive inspection and testing procedures, directly impacting production quality and efficiency.
- Prepared accurate chemical solutions for various laboratory tests and ensured the proper calibration and maintenance of laboratory equipment, guaranteeing the reliability of test data used for quality control decisions.

Education Level

Universitas Brawijaya - Malang, Indonesia   Aug 2021 - Jul 2024
Diploma in Technology Information, 3.86/4.00

Non Formal Educational

Enigma Camp (Bootcamp Full Stack Developer - Malang, Indonesia   Oct 2024 - Jan 2025
Java Springboot, React JS, & React Native

- Intensive training program, how to build scalable backend applications using Java Springboot, and develop interactive frontend interfaces with React.js for web and React Native for mobile apps.
